UFT | ALM | Eggplant | VBScript | SQL | UNIX | EDI | SAP | Java Swing

WORK EXPERIENCE

Deloitte, Hyderabad, TG (May 2019- Current)
Automation Tester

Client: City of Hope Medical Centre
Project: Automation QCoE
Roles & Responsibilities:
- Create a framework from scratch which could be used to automate Integration, Smoke and Regression Test Suites
- Development and Maintenance of Smoke, Integration and Regression Suite.
- Created various accelerators using Excel Macros and Eggplant RPA tool whenever required

Tools: Eggplant Functional, HP ALM, EPIC EMR, Excel Macros, Modular Framework

Client: Deloitte Internal
Project: Reimagine SAP Testing
Roles and Responsibilities:
- Create and maintain a generic SAP Test Automation suite pertaining to P2P and OTC cycle, which can be used across various clients who use the standard version of SAP. using UFT 14.53
- Made changes to framework to automatically raise a defect in ALM whenever a script fails. The script would fetch values from excel as to what should go into the defect.
- Made changes to the framework to combine various line items in excel into a single line which would be brought into UFT as an array.
- Created an automated Test Data Generator tool using JAVA and Swing GUI which would help client select scenarios and create the skeleton Test Data automatically.

Tools: UFT 14.53, SAP, ALM, Hybrid Framework

Client: Deloitte Internal
Project: Kinetic Financial Services
Roles and Responsibilities:
- Create and maintain a generic SAP Test Automation suite pertaining to Finance cycle, which can be used across various clients who use the standard version of SAP using UFT 14.53 in AWS EC2 machine.

ABOUT ME

A highly motivated, passionate and organized QA Engineer with experience in all phases of STLC and having Strong knowledge of US Healthcare (Payer and Provider), Automated SAP GUI and FIORI screens using UFT, Automated end to end scenarios in EPIC EMR using Eggplant Functional Testing Tool. Seeking to work in globally competitive environment on challenging assignments that shall yield the twin benefits of the job satisfaction and a steady-pace professional growth.

ACCOMPLISHMENTS

- Received Pillar of the Month Award while working with CTS
- Received SPOT Award for 4 months at Deloitte
- Received Applause Award for a quarter at Deloitte

EDUCATION

Bachelor of Engineering: Electrical And Electronics
CBIT – Hyderabad
(August 2011 – May 2015)

- Made changes to framework to get the test data from S3 bucket in AWS console instead of HP ALM.
- Created an AOM script that checks all the system settings and connectivity and then launches UFT if all preliminary checks pass.

Tools: UFT 14.53, SAP, ALM, Hybrid Framework, Amazon AWS EC2 machine, Amazon S3 storage

Deloitte, Bangalore, KA (September 2018- May 2019)
Automation Tester

Client: Caterpillar Inc.
Project: Automation CoE
Roles & Responsibilities:
- Developed 50+ end to end test scripts involving various Mainframes and SAP transactions using BPT Framework
- Took ownership of SAP CRM module containing over 100 E2E test scripts.
- Worked with various client stakeholders for defect fixes and to change the test scripts wherever necessary.
- Worked from Client location and maintained good relations.

Tools: Microfocus UFT, ALM, SAP, Mainframes, BPT Framework

Cognizant, Hyderabad, Telangana (February 2016- July 2018)
Test Analyst
